

Multi Dimensional Thinkers

Consulting: Enterprise Data Architecture And Enterprise Data Management
"Empowering Businesses To Maximise The ROI Of Their Data Assets"

COMPANY PROFILE (August 2017)

Multi Dimensional Thinkers was formalised in 2015. It is based in Randburg, Gauteng, South Africa. The company has one resource, the founder and CEO, William Richard Evans. The income generated is currently based on consulting time. The 2017 Tax year income for the company was under R1 million Rand. Bench time was spent enhancing the company's services, and developing and marketing the company as a whole.

Vision: A world fully employed in the battle of learning how to use data in such a way that they can help maintain a single global version of the Truth.

Mission: Guiding enterprises to develop, leverage and structure their Enterprise Data Management capabilities to maximise the overall effectiveness, efficiency and bottom line of the Enterprise, through Consulting. Furthermore enhancing individuals through Training, Testing and Inspiring them, by showing them that the new wave of work is in data management, and that each person has the ability to work with one or more aspects of data.

"**The Data Revolution** will provide work for everyone who wants to find the truth. The only way we can see the truth is through the data, which at one moment or another, represents a perspective of it. In the new digital world, and the internet of things, our ability to work with data will become as basic a requirement as being able to speak. The challenge is enhancing people's paradigms and skills so that they are able to engage with data. This requires a movement of passionate people." (William Evans)

Our services:

Consulting: William Evans is an Internationally Certified Data Management Professional through the International Data Management Association (DAMA I) and is the founder of Multi Dimensional Thinkers (Pty) LTD. William is the only consulting resource Multi Dimensional Thinkers has available for consulting. His consulting profile is on Page 2.

Training: William is also involved in two types of Training: Online Training Modules, which are still being developed, and classroom training (Foundational Theory and Practical), covering The Data Atom Data Management Framework and its integration of all the Data Management Disciplines: Data: Governance, Architecture, Security, Quality; Rationalised Terms and Definitions; Glossaries, Taxonomies and Ontologies; Definition Management; Reference Data Management; Meta-data Management; Master Data Management; Data Warehousing; Data Lakes; Big Data; Business Intelligence; and Document and Content Management.

Testing: William has developed an online aptitude test, which he is using to test people who are interested in Data Management as a future career. The test identifies which Data Disciplines are a Test Subject's strengths, their accuracy and their ability to perform analysis and tracking of data between the physical and virtual world.

Multi-Dimensional Thinkers (2015/424877/07) is not a VAT registered entity.

Multi Dimensional Thinkers

Consulting: Enterprise Data Architecture And Enterprise Data Management
"Empowering Businesses To Maximise The ROI Of Their Data Assets"

COMPANY PROFILE (August 2017)

William Richard Evans

William Richard Evans (known as William) has over 26 years practical IT experience. He has focused on enhancing Business and Information Technology by exposing the challenges being experienced, as a consequence of immature Data Management. The following are his areas of expertise:

Enterprise Architecture

Enterprise Data Architecture

Enterprise Master Data Governance

Business Capability Development - Innovation

Business Capability Development - Enterprise Information Management

Business Capability Development - Enterprise Data Management

Master Data Creation from Legacy

Workflow Development, Management and Architecture

Enterprise Business Process Management

Business Standards and Improvement Management

William has worked in a variety of industries, including among others, Education, Health Care, Mining, Government, Banking, Retail, Disaster Recovery, Petrochemical, Insurance, ICT (Information Communication and Technology), Telecommunications and Unified Communications.

Spent 2 years migrating and implementing Master Data from Legacy systems to SAP ERP, and 4 years guiding the Enterprise to leverage Enterprise Master Data effectively and efficiently.

In the last 5 years William has designed and implemented a fully integrated Data Management Framework, complete with the uniquely integrated Enterprise Architectures, matured to operate in concert, to remove the ineffectiveness and inefficiencies that span the entire Enterprise, and hampers flow of accurate and consistent data to the areas of the Enterprise that need it.

Part of William's value add, is that he is an internationally Certified Data Management Professional and as such is a member of the International Data Management Association (DAMA I). He remains connected to this innovative team of Data Management Professionals and he therefore has wider capabilities than just his own experience and skillset.
